

# Easter School Econometrics

7<sup>th</sup>-11<sup>th</sup> April 2003

**Nuffield College, University of Oxford**

Presented by:

**Søren Johansen and Anders Rahbek**  
**University of Copenhagen**

The topic will be:

**Linear and non-linear modelling of non-stationary multivariate time series with economic illustrations**

### **Registration:**

The Easter School in Econometrics is funded by the Royal Economic Society and the Economic & Social Research Council. It is intended primarily for advanced post-graduate students, but is also open to recently-appointed members of the teaching and research staff. Participants are encouraged to join the Royal Economic Society. *Funded places* are available for 20 participants coming from the UK and the EU. The funding covers meals and accommodation. There is a limited number of *non-funded places*. In addition there is a *fee* of £1000 for non-academic participants and £150 for participants who are not members of the Royal Economic Society.

The *Application for registration* should contain c.v., a brief description of research area, and email addresses of your Head of Department and also your supervisor if you are a research student. Applications should be submitted not later than **1 February 2003** to

Maxine Collett
