

Mixing in Southampton There are 16 wards in the 2001 Census results for Southampton.

Mixed wards: The number of mixed wards has increased from 2 to 5 during the 1990s: these all have more than one tenth White population and more than one tenth Black and Asian population.

The number of very mixed wards has increased from 0 to 1 during the 1990s: these all have more than one quarter White population and more than one quarter Black and Asian population.

15 wards have more than three quarters White. No wards have more than three quarters Black and Asian.

Most Black and Asian residents: The ward with most Black and Asian residents is Bevois, which has 4150 Black and Asian residents, 30% of its population.

Natural change and immigration: In this ward, the number of Black and Asian births in one year was 86; they were less than growth from immigration which was 158. This means that the population is growing naturally in this ward, because people are having children while there are fewer elderly people.

Migration in the UK: For the same ward, 529 White residents came, and 84 Black and Asian residents left during the year for other parts of the UK. This is net movement in 2001-2002.

There is dispersal from this ward, as is expected from urban areas with limited housing. There is not retreat into groups' own areas.

Profile prepared by the Cathie Marsh Centre for Census and Survey Research, University of Manchester.

Notes

Black and Asian: all groups in the Census other than White, including those with mixed origins.
Migration in the UK: the net impact of migration during the year 2000-2001, to and from other parts of the UK.
Births and immigration are also for the year 2000-2001.
